XP25 PLUS

A wide range of manual pallet trucks, simple and reliable, specific for non-demanding loading and unloading operations on any type of flooring. Also available in the INOX versions, with weighing scale, and in the pantograph version, in order to also allow use as a practical work surface.

TL^{ac} - TN

These are pallet trucks by definition, specific for all operations of transporting and loading/unloading goods, when the routes are short on average and the activity is not very intensive. Compact but sturdy, these pallet trucks provide excellent performance in complete safety and stability. Ideal in small warehouses and shops, they can also be easily used inside lorries and containers.

TLX - TSX

To combine excellent performance with outstanding operator comfort, the OM pallet trucks with platform include several design features: electronic control of traction/braking, short ergonomic tiller which is electrically assisted, patented electro-hydraulic stability system, lateral support guides, front countertop with compartment for storing objects, low platform with soft non-slip mat.

TLR - TSR^{ac}

For OM pallet trucks with driver on board, the ergonomics are managed in detail in order to provide the operator with the utmost comfort under any conditions. Excellent performance, thanks to the use of accurate, electronically controlled motors. A wide range of standard setups, with electric steering, speed control when turning and the introduction of the revolutionary e-ABS braking system.
